

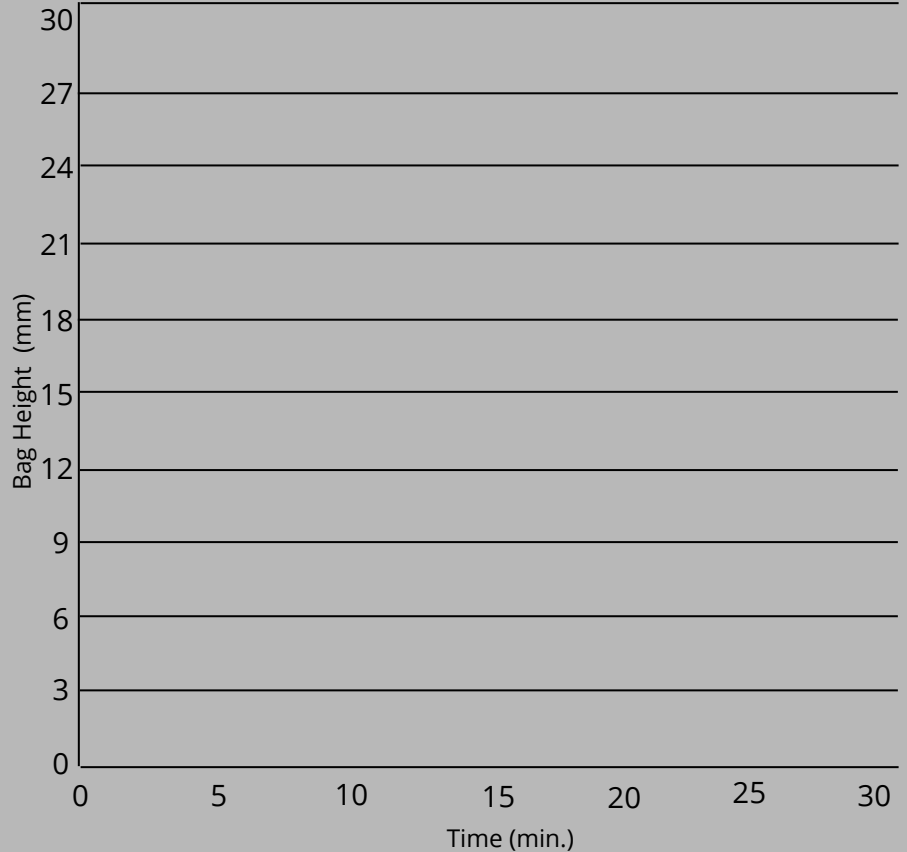

## Chart Inflation

Time (Min.)	Height (mm)

## Bag Height vs. Time

# Fermentation in a Bag

1. Mix 1 tsp of yeast with 1 tsp of your food source.
2. Add 50ml (1/4 C) of warm water.
3. Gently Mix.
4. Using this notecard and your ruler to measure the inflation of the bag every 5 minutes. Use this card to get a more accurate reading on your ruler.
5. Chart inflation in millimeters on the back of this card, then graph.
